

NOAA Ship RONALD H. BROWN - Scientific Berthing Plan

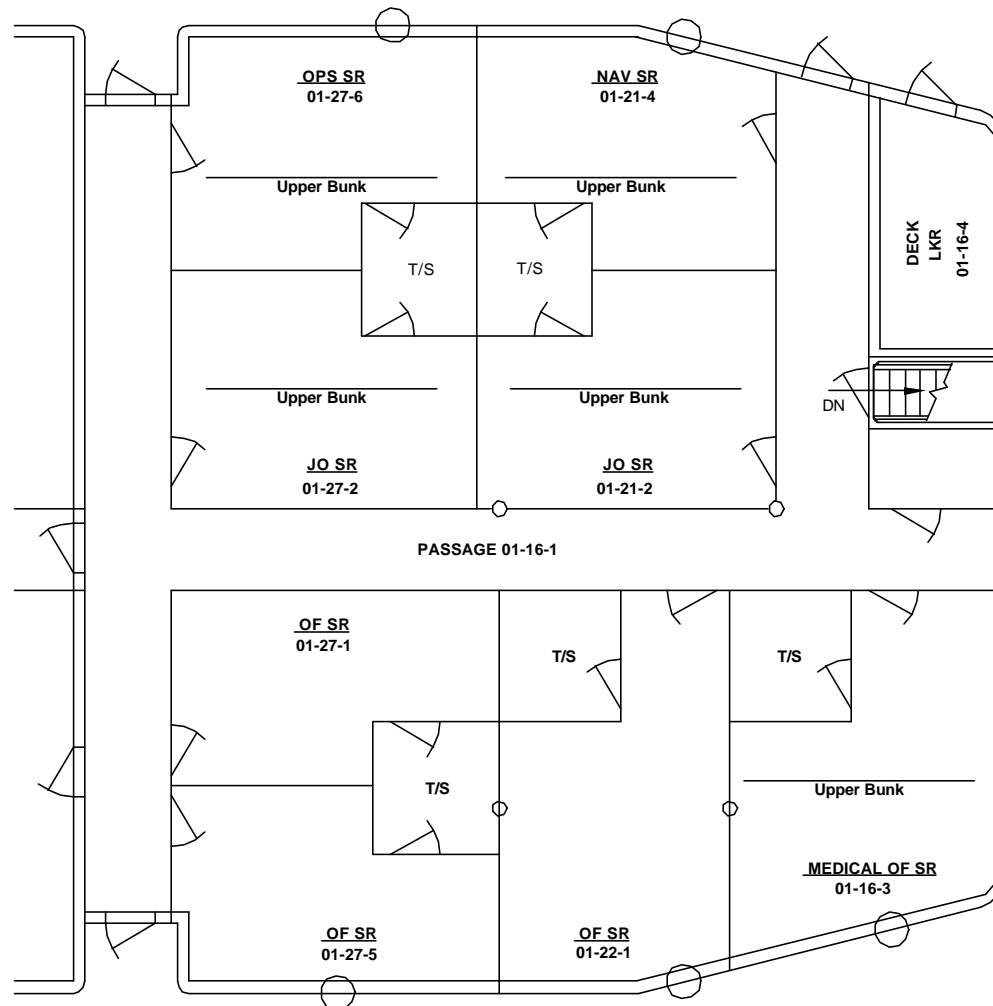

03 LEVEL

(52'-0" ABL)

Each stateroom available for scientists typically has two berths. Adjoining staterooms share a head and shower, accessible from each room. Berthing assignments are made by the Chief Scientist. Sheets, pillowcases and towels are provided. There is no steward service; scientists are responsible for keeping their quarters clean and orderly. Upon completion of the cruise, the departing scientists shall give their quarters a thorough cleaning so they will be habitable for the next occupants.
